

Management of Diabetes mellitus type 2 through Traditional Healing Methods

200 days schedule (CC8259) for treatment of complicated cases of Type II Diabetes (Days 81 to 120).

Pankaj Oudhia

Introductory Note

According to the website of American Diabetes Association Type 2 diabetes is the most common form of diabetes. In type 2 diabetes, either the body does not produce enough insulin or the cells ignore the insulin. It is considered as incurable disease and around the world research works and studies are in progress to develop new formulations. The research on herbal treatment of Diabetes is also in progress. In India the ancient literatures related to different systems of medicine describe much about Diabetes. These literatures are having information about hundreds of herbs and herbal combinations used internally as well as externally in treatment of Diabetes. The licensed practitioners are practicing this knowledge in day today life. Beside these practitioners, there are thousands of Traditional Healers in dense forests, far from modern societies, giving their services. They are also practicing the traditional knowledge but major part of their knowledge and practicing methods are not available in published literatures. These Healers use herbs as well as medicinal insects, spiders, mites, animal parts, medicinal mushroom etc. in treatment of different diseases. They are aware of unique diagnosis methods and different ways of healing. The modern researchers are trying to document their knowledge. The report titled 'Traditional medicinal knowledge about herbs and herbal combinations used in treatment of Type II Diabetes in India with special reference to Chhattisgarh' is an effort to document this traditional knowledge. It is result of on-going effort since 1994 and earlier, to meet and interact with these Healers from different parts of India particularly from Chhattisgarh. In the report efforts has been made to present the knowledge in its original form as noted during surveys. It contains thousands

of schedules prepared by the Traditional Healers of different fields of expertise. These weekly schedules describe morning, noon and evening doses, and both internally and externally used medicines, in detail. Many Healers divide a day in 24 parts or more when they use medicines and prepare detailed schedules, specially in advanced stage of diseases. Such schedules have also been added in this report. Based on interactions with the Healers one month to two years long schedules have been prepared and presented in this report. Schedules suggested by Healers were shown to other Healers and their comments were noted. These comments were further presented in form of modified schedules. This novel method of documentation generated new information and in gist this report can be considered as collective knowledge of the Traditional Healers and associated components of India. While preparing this report thousands of Traditional Healers, herb collectors, herb traders, farmers, senior natives, herb vendors etc. were interacted. Author has added a lot from his traditional medicinal knowledge gathered from vast surveys and from his forefathers as family tradition.

Special treatments are important part of this report. There are hundreds of Special treatments mentioned in this report. In order to increase the efficacy of herbs and herbal combinations the Healers suggest patients to adopt different special methods like to take advantage of shades of old trees, tree groups and tree complexes. They are also suggested to crush different herbs and combinations through bare sole and palm. Bare Foot Crushing and Bare Foot Walking treatments are parts of this report. Besides these, uses of herbal bed, herbal glasses, herbal mala etc. have also been mentioned. The report is having information about over 3000 herbs, insects, spiders, mites etc. suggested by the Healers in different combinations. Most of the information mentioned in this reports has yet not been reported in reference literatures. Through this report it is coming in front of world community for the first time.

Over 300,000 pictures are important feature of this report. Selection of herbs, its Allelopathic treatment in order to enrich it with medicinal properties before harvest, suitable time of collection etc. have been described in detail.

Many weekly schedules suggest treatment of Diabetes only but most of the schedules suggest treatment for Diabetic patients having different diseases like treatment for Diabetic patients having liver related troubles, treatment of Diabetic patients having heart troubles etc. Treatments of Diabetic patients having complicated troubles like cancer, AIDS and Sickle Cell Anaemia are important part of this report. It gives information about more than 35 human diseases.

Aware of the fact that most of the knowledge on this aspect is still in undocumented form; author is expecting that new researchers in coming generations will add their contributions in this report as it is never ending process. It was not possible to publish this detailed report in form of research paper or report in science journals. There is plan to add interviews of Healers and different films taken during surveys.

This report is effort of author working without team, finance and other kind of support. Author invested his time and efforts to conduct surveys as well as typing each and every word of this report.

Author's dream is to form 'Traditional Healers Foundation' in India as first step and at world level at later stage so that collective traditional knowledge like this can be used for clinical trials and finally for treatment of millions of sufferers around the world, after taking consent and guidance of Traditional Healers. Major part of economic gain from this collective knowledge must go to the Foundation through which it must be reached to the every component.

In complicated cases of Type II Diabetes, the Traditional Healers of Indian state Chhattisgarh use Complex Herbal Formulations. They use it in form of schedules of different durations including 200 days schedule. These Complex Herbal Formulations are used with internal and external remedies and specific food materials. Author has documented traditional knowledge practiced in over 10,000 complicated cases of Type II Diabetes.

This research document presents knowledge about herbs and herbal formulations used in **Complicated Case 8259**. In treatment of such cases there is no thumb rule. The treatment varies from patient to patient. Different Healers give different views and comments on same schedule. It results in modified schedules.
